

YASKAWA

PROVEN WORLDWIDE

30+ Million Pieces of Evidence... and Counting

20 million inverters, 10 million servo axes and 300,000 robots in the field are proof positive that Yaskawa has the engineering expertise, innovative technology and unsurpassed quality to create solutions which inspire complete customer confidence.

In a recent internal study of 100,000 servo motors shipped, Yaskawa found that only 7 were returned for warranty repair. To put that in perspective, a typical out-of-box failure rate goal for manufacturers of brushless servo motors is 0.5% (or 500 failures per 100,000 motors shipped).

**No matter how you add it up, nobody equals Yaskawa.
