

YASKAWA

## Case Study

### Market Square North

#### Highlights:

- Qty 60 Drives
- 20hp thru 150hp, 460v, NEMA 1
- Application: Air Handlers
- Communications via Siemens Apogee

#### Site Brief:

Market Square North is the corporate headquarters of Boston Properties, the 2nd largest property management company in Washington, D.C. and the building owner.

The Regional Director of Engineering responsible for this recently built building, recognized the energy savings potential that variable frequency drives provide. His criteria for drive selection, centered on product reliability, maintainability and the "highest quality". He determined that Yaskawa had the drive that best met these criteria.

As a result, Yaskawa drives are on every air-handling unit in the building.
