

YASKAWA

Case Study

Atlanta Financial Center

Highlights:

- Drives NEMA 1
- South Tower; 12 Air Handlers & 1 Cooling Tower, 10hp thru 25hp
- East Tower; 21 Air Handlers & 1 Cooling Tower, 5hp thru 40hp
- North Tower; 19 Air Handlers & 1 Cooling Tower, 5hp thru 30hp
- Estimated Payback: <12 Months

Site Brief: The Atlanta Financial Center is the cornerstone of the North Atlanta Financial district. Situated atop I-400, the 3-tower complex serves as the north gateway into the city's downtown area and is home to many of Atlanta's top financial and corporate leaders.

The retrofit will replace existing across the line starters and inlet guide vane and discharge damper control systems. Each Yaskawa variable frequency drive will interface with the existing building automation system. When the retrofit is complete, the inlet guide vanes will be locked to the open position and the discharge damper's control disabled.
